Tips to staying young...

- Good skin care means washing your face every morning and night. NOT washing your face at night means you go to bed with toxins, dirt & the environment AND it clinically expedites the aging process 17 days!
- 2 other things that expedite the aging process
 - Sun! Our skin care provides full spectrum for UVA (aging) / UVB (burn)
 - Environment! Protection in the day cream (humectant blend to keep the good stuff in and the bad stuff out) but your foundation / cc cream helps to seal the deal! (eye glass analogy)
